

BNP PARIBAS

The bank for a changing world

FUND MANAGEMENT INDUSTRY CONFERENCE

BNP Paribas Securities Services is delighted to invite you to our popular fund management conference on **Thursday 28 November 2019**

Since the first investment fund launched in the UK over 150 years ago, the asset management world has changed beyond recognition. Faced with continued pressure on fees, a widening geographic and asset class landscape, as well as investors and regulators demanding new levels of transparency, the industry is being challenged to find value in new ways. Asset managers, service providers, technology companies and other market participants can no longer restrict themselves to traditional roles; boundaries are blurring as collaboration becomes essential to survival.

How can we work together to shape the industry for the future?

Our half-day conference brings together voices from across the asset management world, to explore the latest issues influencing our industry.

Speakers include:

- **Mike Ritchie**, Global Head of Implementation, BlackRock Solutions
- **David McCarthy**, Manager, Brexit and International Policy, The Investment Association
- **Clare Vincent-Silk**, Partner, Sionic
- **Neil Ryan**, Head of Investment Analytics and Data Services, BNP Paribas Securities Services
